SUMMARY

I'm a tech enthusiast who loves creating user-friendly websites, designing innovative solutions, and building cloud-based systems. One of my proudest accomplishments is developing a Student Information Management System that simplifies academic data management. I enjoy working with UX/UI teams to craft responsive designs that truly resonate with users. As a Cisco networking and hardware instructor, I've had the privilege of helping students gain confidence in technology. I'm passionate about continuous learning, tackling challenges, and using technology to make life simpler and more efficient.

EXPERIENCE

Freelance Web Developer & Desktop Publisher
Developed visually engaging, user-centered websites that elevate clients' digital presence. Enhanced productivity through advanced Microsoft Office Suite functionalities, streamlining document creation and data management.

Cisco Technical Instructor | Federal Government Girls College (FGGC), Abuloma
Led training sessions on Cisco networking principles, empowering students with foundational networking skills and practical knowledge in digital systems. Provided technical guidance and on-the-spot support, fostering an environment of digital literacy and problem-solving.

Nigeria Navy Secondary School (NNSS), Port Harcourt
Conducted hands-on projects and exercises to improve students' programming proficiency and digital literacy. Offered on-demand technical support to students and staff, resolving software and hardware issues promptly to minimize class disruptions.

EDUCATION

Bachelor of Science (Education) in Computer Science

Lagos State University (LASU) | GPA: 4.01

2019 – 2023

RELEVANT SKILLS

- **Technical Skills:** HTML5, CSS3, Django, React.js, Git, Microsoft Office Suite, Bootstrap, Hardware
